DELE	A1		A2		CIE (B1)						DIE (B2)						DSE (C2)							

Apart from the above information, Castila has other levels of reinforcement, practice and reviewing when the teaching staff considers that it is appropriate according to the students' needs. Castila also proposes objective tests at the end of every level, so that we can evaluate the process and guarantee the perfect timing.

To achieve the C.2 level (mastery) Castila proposes courses based on specific topics such as courses applied to professional purposes (medicine, law, diplomacy, commerce, business, teaching...), Spanish and Latin American literature and society or any course whose objective is communicating in Spanish like a native or developing a professional career in a Spanish-speaking country.
